Covered Employment and Wages for Fourth Quarter 2007: Double-Digit Growth in Total Payroll

by: *David Bullard, Senior Economist*

tables by: *Nancy Brennan, Senior Economist*

From fourth quarter 2006 to fourth quarter 2007, Unemployment Insurance (UI) covered payroll grew marginally faster than its five-year average. Total payroll increased at double-digit rates in approximately half of Wyoming's 23 counties and decreased in only 1.

From fourth quarter 2006 to fourth quarter 2007, total UI covered payroll grew by \$291.3 million (10.9%), marginally faster than its five-year average (10.1%; see Table 1, page 3). UI covered payroll represents approximately 92% of all wage and salary disbursements and 45% of personal income in the state (U.S. Bureau of Economic Analysis, 2007). The state's average weekly wage rose by \$54 (7.1%), also faster than its five-year average (6.6%). Employment increased by 9,555 jobs (3.5%).

place of work as compared to the labor force estimates (see page 21), which are a measure of employed and unemployed persons by place of residence. On R&P's website there are now tables that show employment and wages broken out by age and gender for each of Wyoming's 23 counties (<http://doe.state.wy.us/LMI/earnings/toc.htm>). There are two sets of tables for each county, one by place of residence and another by place of employment.

The covered payroll and employment data in this article are measured by

The Figure (see page 3) shows that

HIGHLIGHTS

- **The third quarter 2007 statewide turnover rate was 37.2%, down 0.4% from 2006Q3. The 6.2% over-the-year decline in mining was primarily responsible. Other industries with declines include information (-2.4%), other services (-1.6%), and manufacturing (-1.3%)....page 13**
- **Compared to May 2007, Wyoming's construction sector created the most jobs of any sector (2,400) and posted the fastest job growth rate (9.1%). Overall, Wyoming employment increased by 7,700 jobs (2.7%)....page 16**

payroll growth peaked at 17.1% in fourth quarter 2006, decreased to 8.0% in third quarter 2007, and rebounded to 10.9% in the current quarter. Employment growth was near 5.0% during 2006, but has since slowed slightly to 3.5% in fourth quarter 2007 (see Table 2, page 4).

Statewide Employment and Wages by Industry

The purpose of this article is to show employment and payroll changes between fourth quarter 2006 and fourth quarter 2007. These economic changes help us gauge the overall strength of Wyoming's economy and identify the fastest and slowest growing industries and geographic areas.

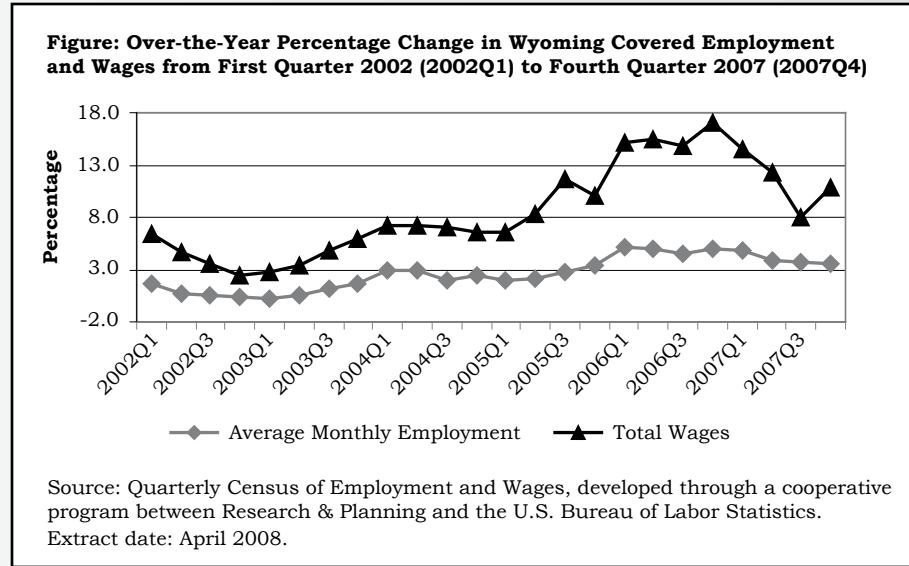

Table 3 (see page 5) shows that construction again posted the largest job gains. It was followed by local government (including public schools, colleges, & hospitals), retail trade, transportation & warehousing, and health care & social assistance.

Construction added 2,366 jobs (9.3%) in fourth quarter, and total payroll

increased by \$66 million (23.0%). Employment fell slightly in construction of buildings, but increased rapidly in both heavy & civil engineering construction (approximately 900 jobs) and specialty trade contractors

(approximately 1,500 jobs). As in previous quarters, strong job growth was seen in oil & gas pipeline & related structures construction.

Local government's total payroll increased by

\$35.9 million (9.9%) and employment grew by 1,592 jobs (3.8%). Educational services (including public schools and colleges) gained almost 600 jobs, public administration (including

cities, towns, and counties) gained more than 500 jobs, and public hospitals gained more than 250 jobs. Arts, entertainment, & recreation (including gambling) added approximately 100 jobs.

In fourth quarter, retail trade gained 1,085 jobs (3.5%). Its total payroll grew by \$16.2 million (8.4%). Large job gains were seen in motor vehicle & parts dealers (more than 150 jobs), building material & garden supply stores (more than 150 jobs), gasoline stations (more than 150 jobs), and general merchandise stores (including warehouse stores and supercenters; more than 250 jobs).

Total payroll in transportation & warehousing increased by \$14.5 million (16.0%) and employment grew by 932 jobs (10.8%). The largest job growth occurred in warehousing & storage (more than 500 jobs) and truck transportation (more than 200 jobs). Employment also increased in air transportation (approximately 50 jobs), support activities for transportation (more than 50 jobs), and couriers & messengers (approximately 50 jobs).

Health care & social

assistance added 743 jobs (3.6%) and its total payroll grew by \$17.3 million (9.1%). Social assistance had the largest job growth (487 jobs, or 9.2%), followed by ambulatory health care services (250 jobs, or 3.2%).

Even though employment growth in mining (including oil & gas) was slow (adding 220 jobs, or 0.8%), its total payroll increased by \$30.8 million (6.2%). Coal mining added more than 400 jobs and oil & gas extraction added approximately 200 jobs. Employment in support activities for mining (including drilling oil & gas wells) fell by approximately 450 jobs.

Employment fell in manufacturing, information, and management of companies & enterprises, but total payroll increased in each of these sectors.

Manufacturing employment decreased by 164 jobs (-1.6%) in fourth quarter. Job losses were seen in wood product manufacturing (approximately 200 jobs), beverage & tobacco product manufacturing (fewer than 50 jobs), and printing & related support

(Text continued from page 4)

activities (fewer than 50 jobs). Employment increased in petroleum & coal products manufacturing (more than 50 jobs) and machinery manufacturing (approximately 50 jobs).

Total payroll in the information sector rose by \$2.2 million (6.1%), but employment fell by 98 jobs (-2.4%). This employment decrease was partially related to noneconomic code changes, including the introduction of the North American Industry Classification System 2007 (see article, page 11). Some firms previously classified in this sector were moved to administrative & waste services.

Employment in management of companies & enterprises fell by 81 jobs (-9.4%). Most of the job losses were in corporate, subsidiary, & regional managing offices. Total payroll increased by \$3.1 million (16.3%) and average weekly wage rose by \$477 (28.3%), mostly because of a large bonus in fourth quarter.

Employment and Wages by County

Table 4 (see page 7) shows total payroll increased at double-digit rates in approximately half of Wyoming's 23 counties and decreased in only 1. Job growth was seen in almost every area of the state, with only Big Horn County reporting lower total payroll and employment in fourth quarter 2007.

Campbell County's total payroll increased by \$34.7 million (10.1%) and employment grew by 1,374 jobs (5.2%). The largest job gains were in construction (almost 500 jobs) and mining

(approximately 200 jobs), but strong growth was also seen in retail trade, other services, and local government (including public schools, colleges, and hospitals).

In Lincoln County total payroll rose by \$29.2 million (44.9%) and employment increased by 929 jobs (13.7%). Job gains were seen in many sectors, but the largest increase occurred in construction (approximately 750 jobs).

In fourth quarter, Sublette County added 759 jobs (17.2%) and its total payroll increased by \$18.1 million (33.3%). Mining (including oil & gas) posted the largest job gains (approximately 500 jobs), but substantial growth was also seen in construction, wholesale trade, transportation & warehousing, and administrative & waste services.

The number of jobs in Fremont County increased by 667 (4.2%) and total payroll grew by \$14.8 million (11.2%). Large job gains occurred in local government (approximately 200 jobs), construction (approximately 150 jobs), and mining (approximately 100 jobs).

In fourth quarter, employment fell by 362 jobs (-7.8%) in Big Horn County. Its total payroll decreased by \$5.4 million (-13.0%). These decreases were mostly related to a noneconomic code change. A large firm was reclassified to Sublette County, where a majority of its employees were working.

Table 5 (see page 8) shows that Natrona County added 780 jobs (2.0%) in fourth quarter and total payroll increased by \$34.2 million (8.3%). The largest job growth occurred in construction (236

Extract date: April 2008.

(Text continued from page 6)

jobs, or 8.8%), health care & social assistance (206 jobs, or 4.4%), and other services (165 jobs, or 10.6%). The apparent job loss in mining (-507 jobs, or -12.1%) was actually the result of the reclassification of a large firm out of Natrona County into the nonclassified region.

Laramie County's total payroll increased by \$45.1 million (12.1%) and employment grew by 1,460 jobs (3.5%; see Table 6, page 10). There was substantial job growth in transportation & warehousing (592 jobs, or 31.5%), retail trade (357 jobs, or 6.3%), local government (including public schools, colleges, and hospitals; 256 jobs, or 4.0%), and health care & social assistance (245 jobs, or 7.4%). Employment fell in construction (-167 jobs, or -5.4%),

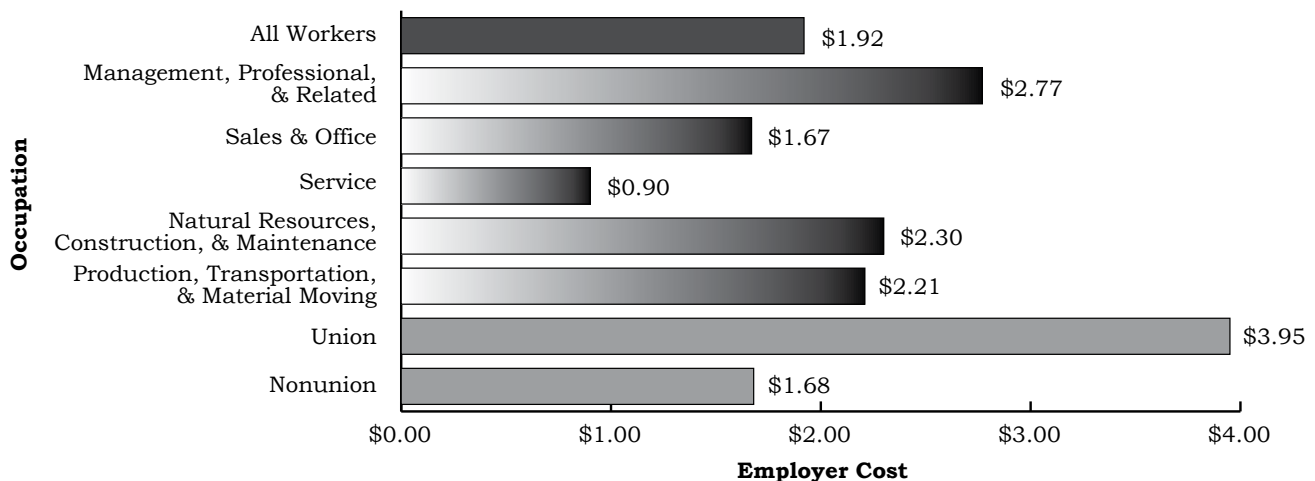

finance & insurance (-14 jobs, or -0.9%), management of companies & enterprises (-71 jobs, or -31.6%), and other services (-130 jobs, or -9.6%).

In summary, Wyoming's economy continued to exhibit solid growth in fourth quarter. Total payroll and employment increased in practically every area of the state. The three largest contributors to total payroll growth were construction, local government (including public schools, colleges, and hospitals), and mining (including oil & gas).

Quality Improvement in the Quarterly Census of Employment and Wages (QCEW) Program and Its Implications for Comparability Over Time

by: David Bullard, Senior Economist

The changes introduced in the 2007 revision to the North American Industry Classification System (NAICS) are relatively small and primarily affect the information sector.

Each year approximately one-fourth of employers with four or more employees covered by Unemployment Insurance (UI) in Wyoming are contacted by mail questionnaire to confirm that they have been assigned to the correct county and industry category (e.g., mining, construction, manufacturing) based on the North American Industry Classification System (NAICS; U.S. Census Bureau, 2007). If it is found that an employer has changed primary business activity, a different NAICS code is assigned to reflect that change. If their primary work location has moved to another county, the county code is changed. These are known as noneconomic code changes. Research staff also review employers' NAICS codes if the business is sold, becomes incorporated, or otherwise changes ownership. In this manner, Research & Planning continuously ensures that employers are assigned to the correct industry category. However, these noneconomic code changes also make it difficult for data users to make direct comparisons across years. Sometimes, large employers may move from one NAICS sector to another.

If an employer has changed primary business activity, a different NAICS code is assigned to reflect that change.

QCEW data are usually published six to nine months after the end of the reference quarter. The deadline for employers to file their quarterly unemployment insurance contributions report is one month after the end of the quarter (fourth quarter 2007 ended December 31 and the taxes were due January 31, 2008). Then the data must be electronically scanned, edited, and cleaned up. Missing reports must be researched and errors corrected. Despite the time lag, QCEW provides employment and wage data at the county and industry level that are not available from any other source.

Each quarter, QCEW data are revised to reflect the receipt of late reports and corrections from employers. At the total level, these revisions are usually quite small. For example, when data for fourth quarter 2006 were

first published in July 2007 *Wyoming Labor Force Trends*, total employment was shown in the tables as 270,182. However, the tables accompanying the article beginning on page 1 show fourth quarter 2006 total employment as 270,472, a revision of 290 jobs (0.1%).

Persons Working in Jobs Covered by Wyoming State Unemployment Insurance, First Quarter 2008

by: Sylvia D. Jones, Senior Research Analyst

Persons working one job in Wyoming earned an average of \$9,846 in first quarter 2008, while those working two, three, or four or more jobs earned at least \$1,976 less.

From first quarter 2007 to first quarter 2008, the number of Wyoming wage records increased by 1.1%. Meanwhile, the number of persons rose by 1.6%, total wages increased by 8.7%, and there was a 7.1% decline in the number of new persons.

Quarterly Turnover Statistics by Industry, Third Quarter 2007

by: Douglas W. Leonard, Senior Economist

The third quarter 2007 (2007Q3) statewide turnover rate was 37.2%, down 0.4% from 2006Q3. The 6.2% over-the-year decline in mining was primarily responsible. Other industries with declines include information (-2.4%), other services (-1.6%), and manufacturing (-1.3%).

Ask an Economist

by: *Carola Cowan, BLS Programs Supervisor*

Q Why doesn't Research & Planning publish more county-level data?

A There are two main reasons why Research & Planning (R&P) is not publishing more county-level data: confidentiality and cost. The R&P section of the Department of Employment is a statistical entity. As discussed in Szuch's article "Understanding R&P's Function, Part II" (2008), a statistical entity must not use data in a way that discloses individuals. Data are used to reveal statistical trends, not to identify certain persons or firms. R&P collects data under the pledge of confidentiality. One of the statutes that govern R&P's confidentiality is the Confidential Information Protection and Statistical Efficiency Act (CIPSEA). Willfully and knowingly disclosing data that were collected under a pledge of confidentiality to unauthorized persons is a felony under this statute.

Since Wyoming has a small population – in fact, the smallest in the nation – and very few employers, we are unable to publish many county-level data. For example, Niobrara County has a population of 2,407 people according to the 2000 decennial census and had 129 employers in second quarter 2007. In order to publish data, we must have at least three employers in a category and employment for an individual employer can't equal or exceed 75% in that category.

Since Wyoming has a small population – in fact, the smallest in the nation – and very few employers, we are unable to publish many county-level data.

We also have to make sure not to violate secondary disclosure rules. Secondary disclosure occurs if somebody can calculate the unpublished data from the published data. For example, if there are eight companies in the mining sector and we suppress data in subsector 211, subsector 212 has three companies, and subsector 213 has three companies, then the number of companies in subsector 211 ($8-3-3=2$) could be calculated. See Table 5, page 8, for an example of data that are not disclosable due to confidentiality.

One way to increase the amount of publishable data would be to increase sample size. This would require mailing, collecting, editing, and analyzing

more data, all of which are very costly. Also, preparing data for publication, printing, and mailing is expensive.

Nevertheless we are able to publish some county-level data. For example, on page 21 the table "Wyoming County Unemployment Rates" contains numbers for the labor force, employed, unemployed, and unemployment rates for all counties and the state as a whole. R&P also publishes Quarterly Census of Employment and Wage (QCEW) data (as seen beginning on page 1 and at http://doe.state.wy.us/LMI/toc_202.htm), Occupational Employment Statistics (OES) data (http://doe.state.wy.us/LMI/OES_toc.htm), and commuting pattern data (<http://doe.state.wy.us/LMI/commute.htm>) by

county. R&P recently made county-level age and gender wage data available at <http://doe.state.wy.us/LMI/earnings/toc.htm>.

R&P also suggests that if you cannot find the data you need at the county level, look at the next higher level of detail. For example, if you are looking for the wages for drywall installers in Sweetwater County on our website (<http://doe.state.wy.us/LMI/EDSPubto20081ECI/TOC000.htm>) and that data is not available, check the Southwest Region and then try statewide data.

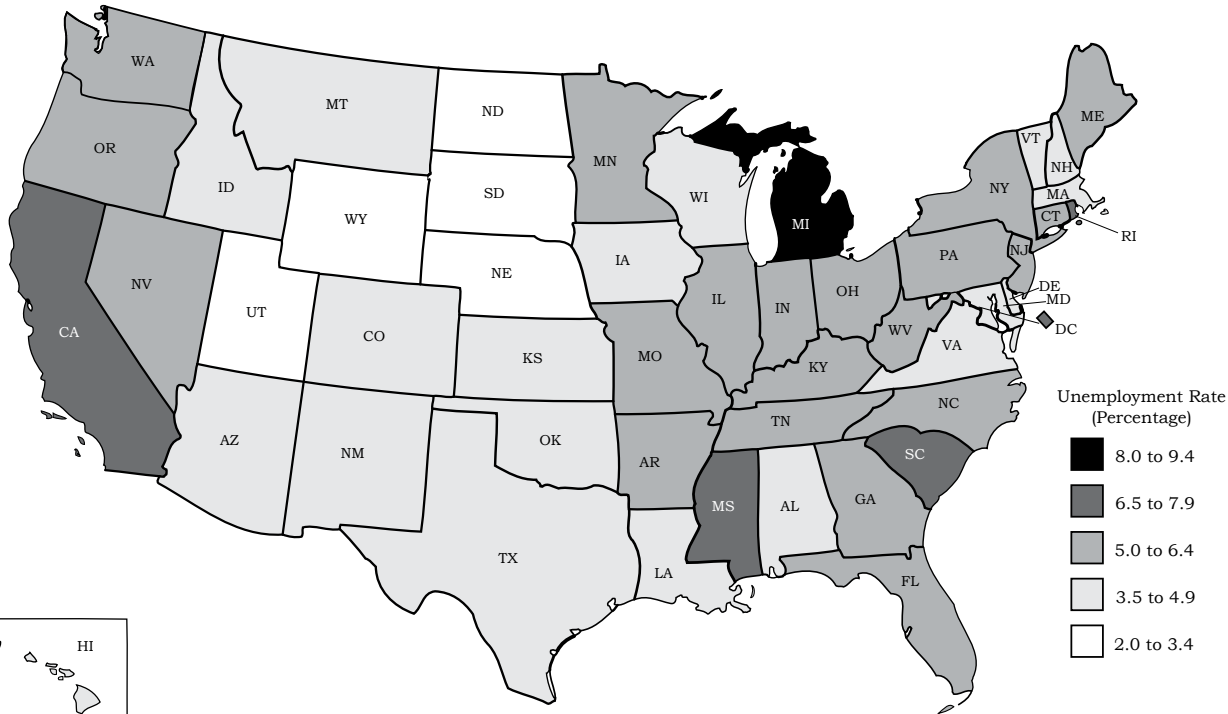

To submit a question to “Ask an Economist,” please e-mail April Szuch at aszuch@state.wy.us.

Coming Soon: 2008 Employer Seminars

Running a business can be a daunting task. Fortunately, there is help for employers. The Wyoming Department of Employment is sponsoring the 2008 Employer Seminars, coming to a town near you. The seminars provide information about workers' compensation, the state mine inspector's office, unemployment insurance, workplace safety, labor standards, and labor market information. Upcoming seminars are scheduled for Rock Springs (August 19), Gillette (October 29), Cheyenne (December 3), and Cody (April 22, 2009). Register online at <http://doe.state.wy.us/employerseminars>.

Construction Adds 2,400 Jobs in May 2008

by: *David Bullard, Senior Economist*

Compared to May 2007, Wyoming's construction sector created the most jobs of any sector (2,400) and posted the fastest job growth rate (9.1%). Overall, Wyoming employment increased by 7,700 jobs (2.7%). The state's unemployment rate increased from 2.7% in April to 2.9% in May, but remained much lower than the U.S. rate (5.2%). It is not unusual for the unemployment rate to increase in the spring as new entrants join the labor force, start looking for work, and may not find work immediately.

From April to May, Wyoming gained 7,200 jobs (2.5%). This level of increase is consistent with normal seasonal patterns. Large seasonal job growth occurred in construction (2,200 jobs, or 8.2%), retail trade (700 jobs, or 2.2%), professional & business services (800 jobs, or 4.3%), leisure & hospitality (1,900 jobs, or 6.0%), and government (including public schools, colleges and hospitals; 1,100 jobs, or 1.6%).

Over the year Wyoming employment increased by 7,700 jobs (2.7%). The largest

job gains were seen in construction (2,400 jobs, or 9.1%), government (1,500 jobs, or 2.2%), leisure & hospitality (1,000 jobs, or 3.1%), and transportation, warehousing, & utilities (700 jobs, or 4.9%). Other growing sectors included wholesale trade (400 jobs, or 4.5%), retail trade (400 jobs, or 1.3%), financial activities (400 jobs, or 3.5%), professional & business services (500 jobs, or 2.7%), and educational & health services (600 jobs, or 2.6%). Employment in the state's information sector was unchanged from a year earlier. Minor job losses were seen in manufacturing (-200 jobs, or -2.0%) and other services (-200 jobs, or -1.7%).

Across Wyoming's 23 counties unemployment rates remained low. Big Horn County posted the highest unemployment rate in May (4.1%), followed by Fremont County (3.7%), and Goshen and Laramie counties (both 3.6%). Compared to a year earlier, most county unemployment rates were stable or fell slightly.

Federal Funding Cuts Lead to Discontinuation of MSA Employment Statistics

Effective with the release of January 2008 data on March 11, 2008, the Bureau of Labor Statistics (BLS) discontinued publication of all nonfarm employment series for 65 small metropolitan areas. In Wyoming, this funding cut affects the Casper metropolitan statistical area (MSA) and Natrona County. These cutbacks are due to a reduction in BLS funding from the 2008 Consolidated Appropriations Act enacted on December 26, 2007. For more details, see <http://www.bls.gov/sae/msareductions.htm>.

Note: Current Employment Statistics (CES) estimates include all full- and part-time wage and salary workers in nonagricultural establishments who worked or received pay during the week that includes the 12th of the month. Self-employed, domestic services, and personnel of the armed forces are excluded. Data are not seasonally adjusted. Wyoming and Laramie County are published in cooperation with the Bureau of Labor Statistics.
