| <p>¹ Incidence rates represent the number of injuries and illnesses per 10,000 full-time workers and were calculated as: $(N/EH) \times 20,000,000$ where</p> <p>N = number of injuries and illnesses EH = total hours worked by all employees during calendar year 20,000,000 = base for 10,000 equivalent full-time workers (working 40 hours per week, 50 weeks per year).</p> <p>² Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.</p> <p>NOTE: Dashes indicate data that are not available. Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.</p> <p>SOURCE: Bureau of Labor Statistics, U. S.
