“Your Source for Wyoming Labor Market Information”

Who We Are

Research & Planning (R&P) functions as an exclusively statistical entity within the Wyoming Department of Workforce Services. R&P collects, analyzes, and publishes timely and accurate labor market information (LMI) meeting established statistical standards. We work to make the labor market more efficient by providing the public and the public’s representatives with the information needed for evidence-based, informed decision making.

Wyoming Growing and Declining Industries Report, 2021Q4

by: Michael Moore, Research Supervisor

A growing or declining industry is defined as an industry's employment level increasing or decreasing for two consecutive quarters by 5% or more compared to the prior the year. For example, all industries that grew or declined in employment by at least 5% from third quarter 2020 to third quarter 2021 (2020Q3 to 2021Q3) and subsequently from fourth quarter 2020 to fourth quarter 2021 (2020Q4 to 2021Q4) were included in the respective tables in this report.

Industries are defined by the North American Industry Classification System (NAICS). For this research, growing and declining industries were determined at the three-digit subsector level. For more information on NAICS, please see <https://www.census.gov/naics/>.

The database used to generate this information was the Quarterly Census of Employment and Wages (QCEW) file, which has roughly a half-year time lag from the distribution of this report. Growing and declining industry information is updated every quarter when new QCEW data become available. Only subsectors with employment sizes of 100 or more are included in these lists. Consequently, while employment in other industries may meet the growth criteria, that growth is taking place in industries with employment of less than 100.

For example, on the growing industries table (see Table 1, pages 5-7), average monthly employment for computer & electronic product manufacturing (NAICS 334) grew by 55.6% (110 jobs) over the year in 2021Q3 and 50.0% (102 jobs) in

Growing and Declining Industries

Historical growing and declining industry data for Wyoming are now available online at <https://doe.state.wy.us/LMI/industries.htm>.

2021Q4, thus qualifying as a growing industry for 2021Q4. The average growth rate for 2021Q3 and 2021Q4 for computer & electronic product manufacturing was 52.8%. Wyoming had 21 growing industries in 2021Q4, which accounted for 25.0% of all industries and 24.6% of the state's total employment (see Table 3 and Figure 2, page 9). Other examples of growing industries in 2021Q4 included support activities for mining (24.8%), management of companies & enterprises (20.9%), accommodation (19.0%), and pipeline transportation (11.8%).

The declining industry table (see Table 2, page 8) reads the same way, except with negative changes, and therefore, declining industries. There were four declining industries in 2021Q4, which made up 4.8% of all industries and 4.1% of the state's total employment. Declining industries included oil & gas extraction (-18.7% average change), petroleum & coal products manufacturing (-10.5%), nursing & residential care facilities (-10.4%), and administration of economic programs (-9.6%).

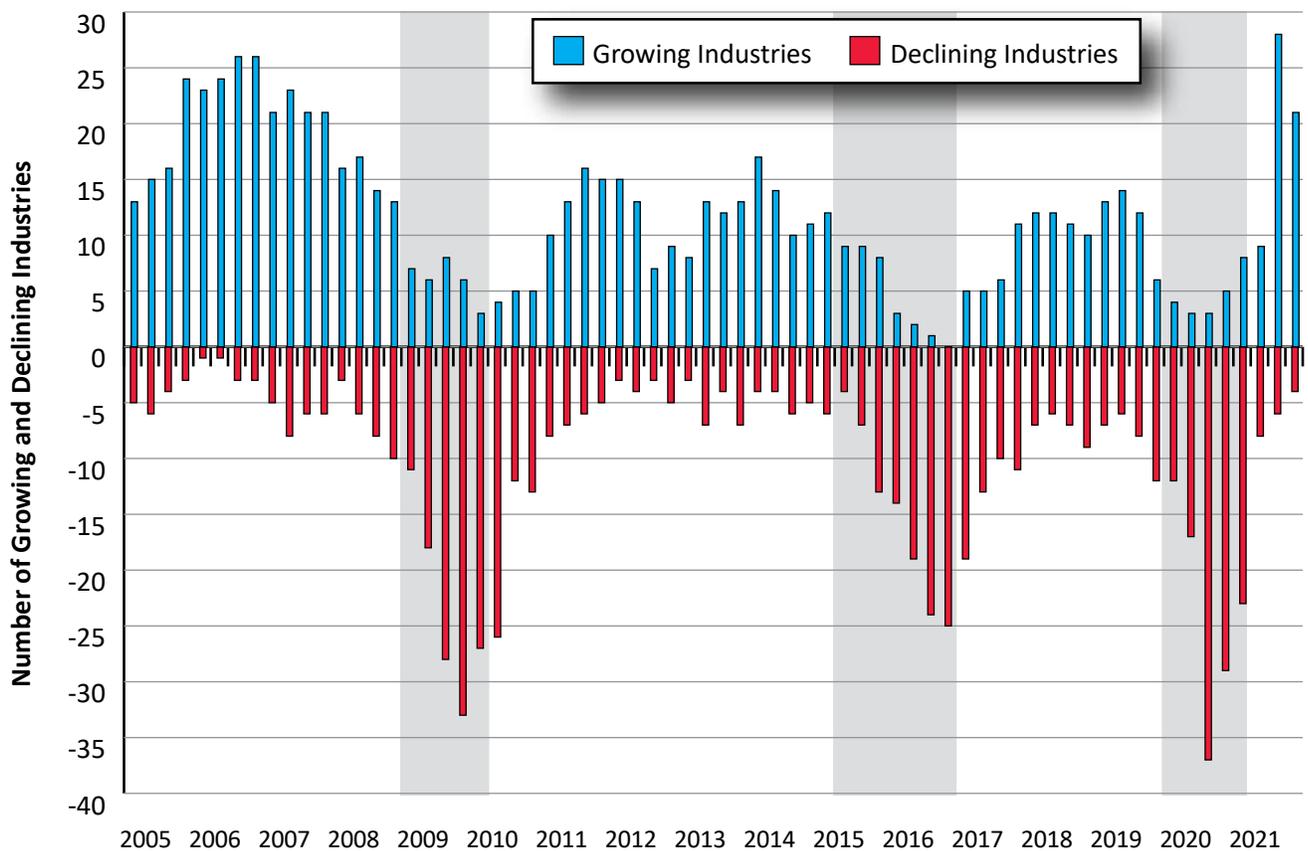

The *average weekly wage* is calculated by dividing total wages for a particular subsector by the total number of jobs and the number of weeks in the observed quarter. In 2021Q4, the average weekly

wage was \$973 for growing industries and \$1,454 for declining industries (see Table 3 and Figure 3, page 9). Overall, the state's average weekly wage was \$1,141.

During periods of economic expansion, the number of growing industries is much greater than the number of declining industries (see Figure 1). For example, the number of growing industries in Wyoming peaked at 26 in 2006Q3 and 2006Q4, compared to three and five declining industries, respectively.

But during economic downturns, there

are far more declining industries than growing industries. R&P has defined an *economic downturn* as a period of at least two consecutive quarters of over-the-year decrease in average monthly employment and total wages based on data from the QCEW. Over the last 20 years, Wyoming has experienced three periods of economic downturn: 2009Q1-2010Q1, 2015Q2-2016Q4, and 2020Q2-2021Q1. During the most recent economic downturn, which was driven by the COVID-19 pandemic and declining energy prices, Wyoming had 37 declining industries in 2020Q3 compared to just three growing industries.

Shaded areas indicate periods of economic downturn: 2009Q1-2010Q1, 2015Q2-2016Q4, and 2020Q2-2021Q1.

Miscellaneous Manufacturing (339)	Manufacturing (31-33)	159	133	26	19.5	161	126	35	27.8	23.7	\$794
Furniture & Home Furnishings Stores (442)	Retail Trade (44-45)	704	670	34	5.1	695	651	44	6.8	5.9	\$878
Clothing & Clothing Accessories Stores (448)	Retail Trade (44-45)	1,356	1,276	80	6.3	1,355	1,181	174	14.7	10.5	\$571

^aIncludes both public and privately owned firms.

^bNorth American Industry Classification System.

^cThe percentage for average change is the employment-weighted average percentage change of the current and prior quarters (employment change current quarter + employment change prior quarter) divided by the employment for the current and prior quarters (employment current quarter + employment prior quarter).

^dThe average weekly wage is calculated by dividing the total wage for the industry group by the total number of jobs for the industry group and the number of weeks in the observed quarter. Please be aware that average weekly wages at the industry group level are susceptible to wage bias due to sample size, occupational distributions, seasonal pay and bonuses, and keying error.

The average weekly wage for all growing industries in 2021Q4 was \$973.
