“Your Source for Wyoming Labor Market Information”

Who We Are

Research & Planning (R&P) functions as an exclusively statistical entity within the Wyoming Department of Workforce Services. R&P collects, analyzes, and publishes timely and accurate labor market information (LMI) meeting established statistical standards. We work to make the labor market more efficient by providing the public and the public’s representatives with the information needed for evidence-based, informed decision making.

Wyoming Growing and Declining Industries Report, 2023Q4

by: *Laura Yetter, Senior Economist*

A *growing* or *declining* industry is defined as an industry's employment level increasing or decreasing for two consecutive quarters by 5% or more compared to the prior the year. For example, all industries that grew or declined in employment by at least 5% from fourth quarter 2022 to fourth quarter 2023 (2022Q4 to 2023Q4) and subsequently from first quarter 2023 to first quarter 2024 (2023Q1 to 2024Q1) were included in the respective tables in this report.

Industries are defined by the North American Industry Classification System (NAICS). For this research, growing and declining industries were determined at the three-digit subsector level. For more information on NAICS, please see <https://www.census.gov/naics/>.

The database used to generate this information was the Quarterly Census of Employment and Wages (QCEW) file, which has roughly a half-year time lag from the distribution of this report. Growing and declining industry information is updated every quarter when new QCEW data become available. Only subsectors with employment sizes of 100 or more are included in these lists. Consequently, while employment in other industries may meet the growth criteria, that growth is taking place in industries with employment of less than 100.

Wyoming had four growing industries in 2024Q1, down from five growing industries last quarter (see Figure 1, page 4). Heavy & civil engineering construction grew the most, adding 877 jobs (a 20.8%

Growing and Declining Industries

Historical growing and declining industry data for Wyoming are now available online at https://doe.state.wy.us/LMI/G_DInd/G_D_Industries.htm

increase) over the year in 2024Q1 and 1,426 jobs (28.2%) in 2023Q4 (see Table 1, page 5). On average, this industry subsector added 1,152 jobs, an increase of 24.5%. The other growing industries were administration of economic programs (an average increase of 181 jobs, or 6.2%), membership associations & organizations (132, or 7.2%), and electrical equipment & appliance manufacturing (73, or 17.7%).

Wyoming's four growing industries in 2024Q1 accounted for 4.9% of all industries and 3.9% of the state's total employment (see Table 3 and Figure 2, page 7).

The declining industries table (see Table 2, page 6) reads the same way, except with negative changes, and therefore, declining industries. There were four declining industries in 2024Q1, one less than last quarter. The greatest decline was seen in furniture, home furnishings, electronics, & appliance retailers, with an average loss of 78 jobs, or 5.8%. The remaining declining industries were performing arts & spectator sports (-46 jobs, or -10.2%), private households (-35, or -13.3%), and furniture & related product manufacturing (-30, or -16.4%).

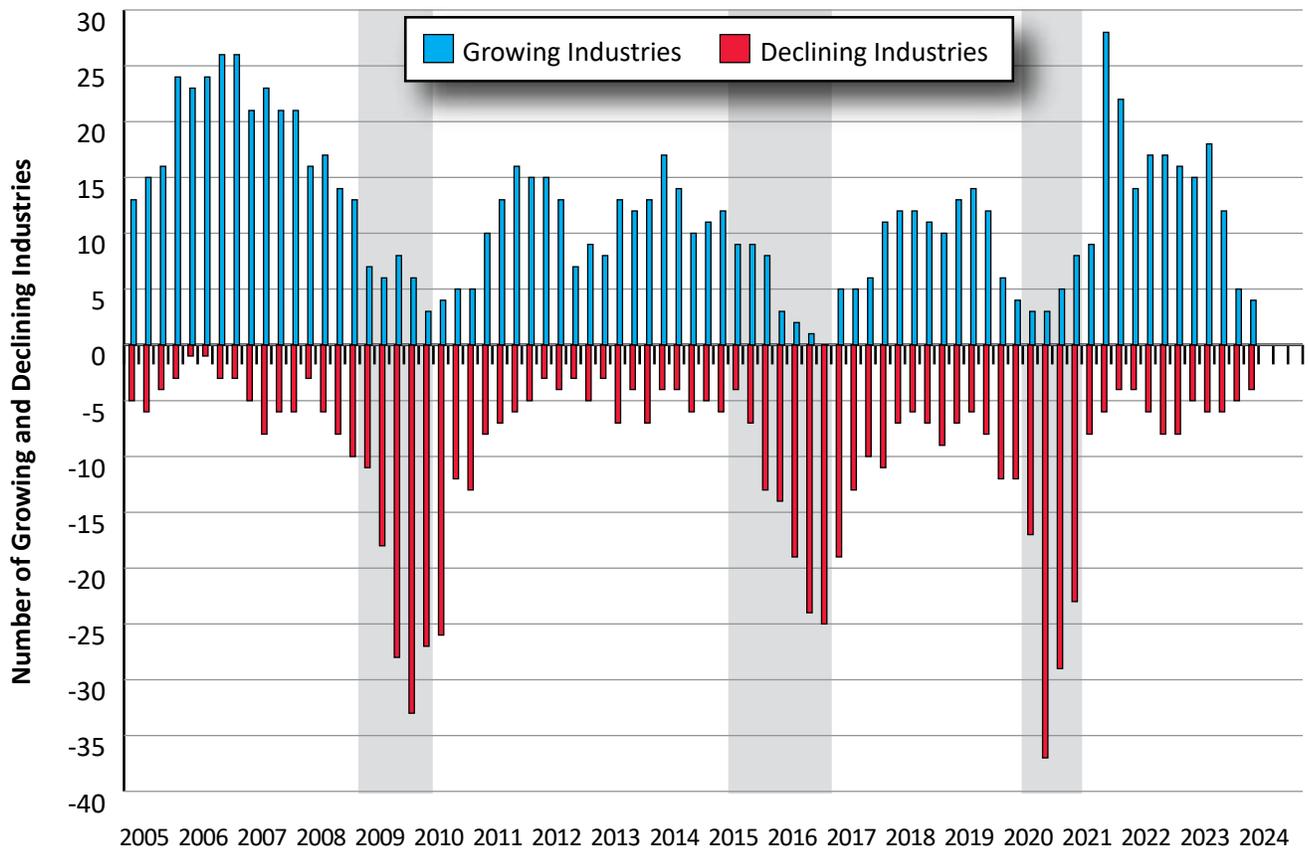

Declining industries made up 4.9% of all industries and 0.7% of total employment.

The *average weekly wage* is calculated by dividing total wages for a particular subsector by the total number of jobs and the number of weeks in the observed quarter. In 2024Q1, the average weekly wage was \$1,320 for growing industries and \$884 for declining industries (see Table 3 and Figure 3, page 7). Overall, the state's average weekly wage for 2024Q1 was \$1,176.

As shown in Figure 1, Wyoming had an equal number of growing and declining industries at four each in 2024Q1. This marked the fewest growing industries since the covid-19 pandemic in 2020.

During periods of economic expansion, the number of growing industries is much greater than the number of declining industries (see Figure 1). For example, the number of growing industries in Wyoming peaked at 26 in 2006Q3 and 2006Q4, compared to three and five declining industries, respectively.

But during economic downturns, there are far more declining industries than growing industries. R&P has defined an *economic downturn* as a period of at least two consecutive quarters of over-the-year decrease in average monthly employment

Shaded areas indicate periods of economic downturn: 2009Q1-2010Q1, 2015Q2-2016Q4, and 2020Q2-2021Q1. Source: Growing and Declining Quarterly Industry Reports, based on data from the Quarterly Census of Employment and Wages. Prepared by M. Moore, Research & Planning, WY DWS, 8/9/24.

Figure 1: Number of Growing and Declining Industries in Wyoming by Year and Quarter, 2005Q1-2023Q4

and total wages based on data from the QCEW. Over the last 20 years, Wyoming has experienced three periods of economic downturn: 2009Q1-2010Q1, 2015Q2-2016Q4, and 2020Q2-2021Q1. During the

most recent economic downturn, which was driven by the COVID-19 pandemic and declining energy prices, Wyoming had 37 declining industries in 2020Q3 compared to just three growing industries.

Table 1: Growing Industries Report for Wyoming, First Quarter 2024^a

Subsector ^a (3-Digit NAICS ^b)	Sector (2-Digit NAICS)	Employment (Current Quarter)				Employment (Prior Quarter)				Growing Industries

Total	Total	10,641	9,408	1,233	13.1	12,010	10,170	1,840	18.1	1,537	15.6	\$1,320

^aIncludes both public & privately owned firms.

^bNorth American Industry Classification System.

^cThe percentage for average change is the employment-weighted average percentage change of the current & prior quarters (employment change current quarter + employment change prior quarter) divided by the employment for the current & prior quarters (employment current quarter + employment prior quarter).

Source: Quarterly Census of Employment & Wages.

The average weekly wage is calculated by dividing the total wage for the industry group by the total number of jobs for the industry group & the number of weeks in the observed quarter. Please be aware that average weekly wages at the industry group level are susceptible to wage bias due to sample size, occupational distributions, seasonal pay & bonuses, & keying error.

Prepared by L. Yetter, Research & Planning, WY DWS, 8/9/24.
