“Your Source for Wyoming Labor Market Information”

Who We Are

Research & Planning (R&P) functions as an exclusively statistical entity within the Wyoming Department of Workforce Services. R&P collects, analyzes, and publishes timely and accurate labor market information (LMI) meeting established statistical standards. We work to make the labor market more efficient by providing the public and the public’s representatives with the information needed for evidence-based, informed decision making.

Wyoming Unemployment Insurance Claims Information, August 2017: Initial Claims Drop to 10-Year Low

by: Patrick Manning, Principal Economist, and Michael Moore, Editor

The 1,120 initial Unemployment Insurance (UI) claims in August marked the lowest month for new initial claims in Wyoming in the last decade. Initial claims have decreased from prior year levels every month since September 2016.

However, Wyoming's labor force and monthly employment also have continued to decline. Wyoming's labor force (the number of employed persons plus the number of unemployed persons actively seeking work) declined by 7,066 (-2.3%) from July 2016 to July 2017, while the number of employed persons decreased by 2,543 (-0.9%).

There are several possible explanations for the concurrent decline in persons working and initial UI claims:

- People left the workforce entirely.
- People lost their jobs and quickly found jobs in other states.
- People voluntarily separated from their employers and found work in other states.

Initial Claims

Initial UI claims decreased by 42.0% (-811 claims) from August 2016 to August 2017.

Notable decreases occurred in natural resources & mining (-57.7% or -101 claims), construction (-53.7%, or -257), and trade, transportation, & utilities (-41.8%, or -120). All industries and counties demonstrated a decrease in initial claims, or were generally unchanged.

Continued Claims

Over the year, the number of unique claimants dropped by 50.1% (-2,689 claimants) while the number of individuals who exhausted their benefits decreased by 51.5% (-299 individuals). Total weeks claimed decreased by 50.1% (-11,062 weeks).

All counties and industries experienced a decrease in total weeks claimed over the year.

^aAn average month is considered 4.33 weeks. If a month has four weeks, the normalization factor is 1.0825. If the month has five weeks, the normalization factor is 0.866. The number of raw claims is multiplied by the normalization factor to achieve the normalized claims counts.

^bRaw claims data that have not been multiplied by the normalization factor.

All totals are subject to rounding error and may not add to the sum of their respective components.

The table above conforms to Wyoming Employment Security Law - Wyoming Statute 27-3-603 regarding confidentiality.
