Introduction

Information about Wyoming's employers is a valuable commodity. Job seekers want to know which employers might need the skills they have to offer. Education and training providers need to know what job skills employers need today and what they are likely to need tomorrow. Organizations engaged in economic development can benefit from linking information about firms with common interests by creating such products as *A Directory of Manufacturers*. Other organizations can provide firms considering their town for relocation information on what other firms are already in the area.

In this publication we present selected information about Wyoming's largest private firms. Authorization to publish each firm's name, primary business locations and industry affiliation was obtained through a mail survey conducted between April 17, 1998 and June 23, 1998. The purpose of the survey was to contact firm representatives authorized to approve publication of information that, under Wyoming Employment Security Law W.S. 27-3-603, is deemed confidential. Based on telephone conversations with employers during the survey process, it is apparent that many more firms would have provided the Department with permission to publish their names if individuals authorized to release this information were locally available. It seems likely that medium and smaller size firms would have an employer representative on the premises who can waive confidentiality and permit publication should further surveys be conducted.

The names and locations of the largest employers in each industry and statewide were obtained from Unemployment Insurance employer tax records. Employer tax records are used extensively for statistical purposes by Research and Planning to describe employment

and earnings in the state. The records contain such information as the number of employees, the employer's payroll and the primary business or industry classification of the firm. Because employer records are used for the administration of the Unemployment Insurance program and for statistical purposes, these records are edited for correctness and currency. Statistical presentation of employment and earnings can be found in several reports published by the Wyoming Department of Employment, Office of Research and Planning.

One purpose of this publication is to pilot the idea of the usefulness of a larger publication encompassing all firms within the State. If there proves to be a large demand for this type of information, we will produce a similar publication listing all Wyoming firms by industry and possibly the number of employees. The amount of information contained in future publications will depend on the response from employers. Many firms are reluctant to allow publication of actual employment numbers. However, ranking the firms by the number of employees may be possible.

For this pilot publication, the Unemployment Insurance employer tax records of June 1997 were used to select the potential employers. The firms having the greatest number of employees as of June 1997 in each industry and statewide were selected. The employers were contacted by mail.

The letter (see Appendix A) mailed to the candidates during the third week of April 1998 asked whether or not the firm's name, industry and location could be used in the publication. A second letter (see Appendix B) was mailed during the first part of May 1998 to firms not responding to the first request. Telephone calls

soliciting participation were placed to a few of the larger firms who had not responded to either request.

The total number of firms contacted as possible employers was 269. Of the 269 candidates, 217 responded, resulting in an 81 percent response rate. Of the responses, 176 (81%) gave permission to publish the firm's information. Because the second request letter responded to employer's questions raised in the first mailing, future surveys will offer a similar explanation of the importance of the information and the manner in which it will be used. By offering more background on the survey and its purpose, the response rate as well as the number of firms allowing the publication of their information should increase.

This publication contains a brief description of the industries followed by the tables listing the firms within each industry. **Only the firms granting permission to publish their data are listed.** Therefore, the tables will not contain an equal number of firms. The name and location of the firms are listed in alphabetical order under their industry heading in order to maintain confidentiality. The Table, "Wyoming's Largest Employers Statewide" (see page 13), is a listing of the largest firms in Wyoming overall. These firms also appear under their appropriate industry headings.

In order to improve knowledge about Wyoming as a place to bring a company or even a family, people need to be made aware of the job opportunities available in Wyoming. The Employment Resources Division provides many valuable tools, such as local Employment Resource Centers that can be used to answer questions about the availability of jobs and the availability of people to work in those jobs.

This publication is designed to assist local Employment Resource Centers in the area of matching employees to firms in which they show interest. It is also designed to give firms an

opportunity to see what other firms are involved in similar operations. Firms interested in relocating to Wyoming can use the publication to judge the level of competition and compatibility and the level of support other firms might provide. The Research and Planning Section of the Wyoming Department of Employment constantly receives requests for information about employers. Until now, these requests could not be addressed. Conducting this survey and publishing the data has filled a need for valuable information on Wyoming's employers.

Since this is a pilot publication, the Employment Resources Division encourages readers to submit suggestions on how to improve the publication. If you have any comments or questions regarding this publication, please contact Research and Planning:

The Industries

All employers in the United States are classified into one of nine major industries according to the firm's primary activity, service or product. The nine industries are as follows:

- Agriculture
- Mining
- Construction
- Manufacturing
- Transportation, Communications and Public Utilities (TCPU)
- Wholesale trade
- Retail trade
- Finance, Insurance and Real Estate (FIRE)
- Services.

Each industry is divided into separate Standard Industrial Classification (SIC) codes. The codes are designed to group business establishments having similar characteristics. By using a standard classification code for all establishments in the United States, the data is uniform and comparable. Statistical agencies can analyze establishment data based various levels of detail. Each industry includes one or more subdivisions; an industry division, a two-digit major group, a three-digit industry group or a four-digit industry code. For example, within the mining industry, the major group of coal mining is 12, the industry group of bituminous coal mining is 122, the industry code for bituminous coal mining on the surface is 1221 and the industry code for underground bituminous coal mining is 1222¹.

Goods - Producing Industries

- Agriculture
- Mining
- Construction
- Manufacturing

Employers engaged primarily in agricultural production, commercial fishing, forestry or other related fields are classified under agriculture. Agricultural production covers establishments such as farms, nurseries, greenhouses and orchards involved in the production of crops, plants, flowers and seeds. Also included under agricultural production are establishments such as ranches, dairies, and specialty animal farms. Commercial fishing establishments

are included in the agriculture industry as well as commercial hunting and trapping. Fish hatcheries, game preserves and establishments involved in forestry or forestry services are all elements of the agriculture industry.

The mining industry consists of all establishments involved with mineral extraction. Not only are establishments performing the actual extraction of minerals classified under mining, but establishments that explore and develop mine sites are included as well. Milling, well operations and other mining support services are part of the mining industry.

All types of construction can be found within the construction industry. Building construction by general contractors includes residential and commercial property construction. Heavy construction deals mainly with constructing structures other than buildings. Plumbers, electricians, carpenters and other special trade contractors are all classified under construction.

Employers whose business involves changing raw materials into new products constitute the manufacturing industry. The new products can be finished or unfinished. For example, a finished product would be a shirt. An unfinished product would be the bolt of material used to make the shirt.

Services - Producing Industries

- Transportation, Communications and Public Utilities (TCPU)
- Wholesale trade
- Retail trade
- Finance, Insurance and Real Estate (FIRE)
- Services

TCPU establishments provide transportation and communication services. Transportation is comprised of such businesses as railroads, buses, airports, trucking firms and travel agencies. Communication services engage in telephone services, television and radio broadcasting. Public utilities such as gas, electricity, water and sanitation are included in the TCPU industry classification. The United States Postal Service is also contained in this industry.

Employers in wholesale trade sell merchandise to retailers or other wholesalers. The most common types of establishments within the wholesale trade industry are merchant wholesalers, sales offices maintained by manufacturing or mining establishments to sell their products and agents, brokers or commission merchants. The wholesale trade industry deals with durable goods such as machinery or equipment and nondurable goods such as clothing and groceries.

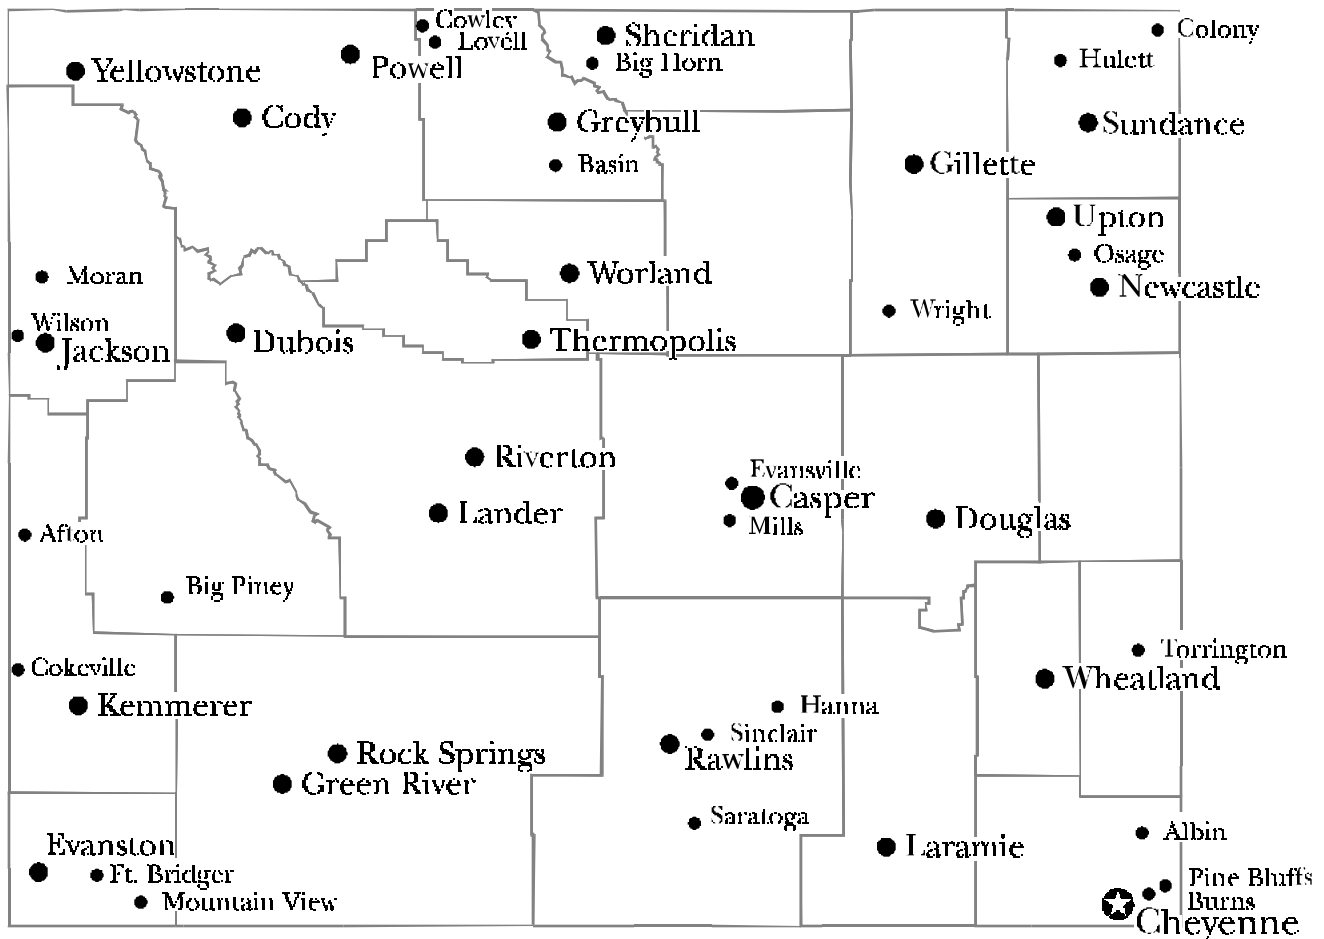

The retail trade industry is similar to the wholesale trade industry. However, establishments in retail trade sell merchandise to the general public for personal or household consumption. Establishments that sell products to businesses are classified under retail trade even though the products are not necessarily for personal or household use such as office supply stores or lumber yards.

The FIRE industry is made up of firms involved in all aspects of finance, insurance and real estate. Finance includes banks, credit unions and other financial institutions engaged in investments dealings or investment management. Real estate includes all areas of buying, selling, leasing and developing real estate.

Establishments providing services to businesses or individuals are listed in the services industry. Some of the firms included are hotels, repair shops, medical offices and schools. Services performed specifically for other industries are classified under the related industry.

1 Office of Management and Budget; *Standard Industrial Classification Manual* 1987, page 43.

Appendicies

Appendix A

April 17, 1998

Dear Employer:

The Research and Planning Section of the Department of Employment has compiled two lists of Wyoming's largest private sector employers. One list is based on the annual average number of employees reported to the Department of Employment through the unemployment insurance program during the period July 1, 1996 to June 30, 1997. A second list, also based on the annual average number of employees, was compiled by major industry classification. Your company meets the criteria to be included on one or both lists.

The Department of Employment would like to release the lists mentioned above in a publication with certain restrictions: Only your firm's name, city(ies) of location, and the industrial sector would be published. **Your actual employment or wage data would NOT be printed.** All information from the unemployment insurance program is strictly confidential. It is only with your permission that we may release your name to the public. The lists provide valuable, frequently requested labor market information, and your participation is encouraged. Please check the statement appropriate to your firm. Fax this release to Research and Planning at (307) 473-3834 or 3806 by May 1, 1998.

If you have any questions, contact the Research and Planning Section at (307) 473-3801. Thank you for your cooperation. If you would like a copy of the published list, please check here_____.

Sincerely,

Tom Gallagher, Manager
Research and Planning Section

PLEASE CHECK ONE OF THE FOLLOWING STATEMENTS

By signing this document, the undersigned represents and guarantees that he or she has authority to do so on behalf of the above named employer.

- () Permission is granted to identify this firm in a ranking of the largest private industry firms in this state until December 31, 1998.
- () No, permission is not granted to identify this firm in a ranking of the largest firms in the state.

Signed

Printed Name and Title

Date

Appendix B

May 4, 1998

Dear Employer,

Last month, I sent your office a letter (attached) requesting permission to publish your firm's name as one of Wyoming's largest employers. Over half of the employers I contacted responded to the first request and your response may be among the late arrivals. If this letter crossed your reply in the mail please disregard this letter, and we thank you for your cooperation.

Some employers called in response to the first mailing, dated April 17, to ask why we wanted to publish a list of Wyoming's largest employers. The major reason for seeking your permission to publish your company's name as one of the state's largest employers is that local economic development agencies frequently request this information from us. In order to meet the demand for this information, we are asking that you consider approving the enclosed request. As stated in the attached letter we will not publish any confidential information.

The publication will only include your company's name and location.

Enclosed for your convenience, is a self addressed stamped envelope. I would appreciate your response by May 15, 1998.

Thank you for your time.

Sincerely,

Tom Gallagher
Manager, Research and Planning

Appendix C

The following list shows the Standard Industrial Classification (SIC) codes and a brief description of the establishments mentioned in this publication.

Agriculture

<u>SIC</u>	<u>Description</u>
0133	Sugarcane and Sugar Beets
0139	Field Crops, Except Cash Grains
0181	Ornamental Floriculture and Nursery Products
0211	Beef Cattle Feedlots
0212	Beef Cattle, Except Feedlots
0213	Hogs
0782	Lawn and Garden services
0783	Ornamental Shrub and Tree Service
0851	Forestry Services

Mining

<u>SIC</u>	<u>Description</u>
1221	Bituminous Coal and Lignite Surface Mining
1222	Bituminous Coal Underground Mining
1311	Crude Petroleum and Natural Gas
1381	Drilling Oil and Gas Wells
1459	Clay, Ceramic, and Refractory Minerals
1474	Potash, Soda, and Borate Minerals

Construction

<u>SIC</u>	<u>Description</u>
1541	General Contractors--Industrial Buildings and Warehouses
1542	General Contractors--Nonresidential Buildings, Other Than Industrial Buildings and Warehouses
1611	Highway and Street Construction, Except Elevated Highways
1623	Water, Sewer, Pipeline, and Communications and Power Line Construction
1629	Heavy Construction
1711	Plumbing, Heating, and Air Conditioning
1731	Electrical Work
1761	Roofing, Siding, and Sheet Metal Work
1771	Concrete Work

Manufacturing (Continued on next page)

<u>SIC</u>	<u>Description</u>
2063	Beet Sugar
2086	Bottled and Canned Soft Drinks and Carbonated Waters
2385	Waterproof Outerwear
2421	Sawmills and Planing Mills, General
2431	Millwork
2711	Newspapers: Publishing, or Publishing and Printing

Manufacturing Continued

SIC	Description
2812	Alkalies and Chlorine
2911	Petroleum Refining
3241	Cement, Hydraulic
3275	Gypsum Products
